

POPULATION AFFECTS PEOPLE & OUR PLANET

Humans have consumed more resources in the past 50 years than the whole of humanity before us.* As global population increases, we diminish the Earth's ability to replenish natural resources, drive other species to extinction, and undermine sustainability for future generations.

*Australian Academy of Science (2017)

FACTS

RESOURCE ALLOCATION & EXPLOITATION

FOOD INSECURITY

821 million people are affected by undernourishment or chronic food deprivation.

OVERFISHING

1/3 of the world's fisheries have been fished at a biologically unsustainable level.

WATER SCARCITY

2.1 billion people lack water services that meet Sustainable Development Goals' standards.

HABITAT DESTRUCTION

WILDLIFE

Human activities have contributed to the loss of 60% of the planet's vertebrate populations since 1970.

DEFORESTATION

The effects of deforestation contribute significantly to climate change, accounting for nearly 10% of all greenhouse gas emissions.

AIR & WATER POLLUTION

WATER POLLUTION

Humans add 8 million metric tons of plastic to the oceans every year.

AIR POLLUTION

92% of the global population live in places with unhealthy air quality.
